

# Chemical Reactions

## AP Chemistry · Vocabulary

Write each word 3 times. 把每个单词抄写三遍。

| English                                                                                               | 中文     | Write it 3 times (English) |       |       |
|-------------------------------------------------------------------------------------------------------|--------|----------------------------|-------|-------|
|  chemical reaction   | 化学反应   | _____                      | _____ | _____ |
|  precipitate         | 沉淀     | _____                      | _____ | _____ |
| = net ionic equation                                                                                  | 净离子方程式 | _____                      | _____ | _____ |
|  spectator ions      | 旁观离子   | _____                      | _____ | _____ |
|  physical change     | 物理变化   | _____                      | _____ | _____ |
|  chemical change     | 化学变化   | _____                      | _____ | _____ |
|  Stoichiometry       | 化学计量   | _____                      | _____ | _____ |
|  limiting reactant | 限量反应物  | _____                      | _____ | _____ |
|  theoretical yield | 理论产量   | _____                      | _____ | _____ |
|  titration         | 滴定     | _____                      | _____ | _____ |
|  equivalence point | 等当点    | _____                      | _____ | _____ |
|  acid              | 酸      | _____                      | _____ | _____ |
|  base              | 碱      | _____                      | _____ | _____ |
| ↑↓ redox                                                                                              | 氧化还原   | _____                      | _____ | _____ |
| ↑ Oxidation                                                                                           | 氧化     | _____                      | _____ | _____ |

| English     | 中文 | Write it 3 times (English) |
|-------------|----|----------------------------|
| ↓ reduction | 还原 | _____                      |
