

4 Arrays — Part 1 — Answers

Answers

Work through these after you have tried the questions yourself.

2.1 `a[0]` is 7; `a[2]` is 9.

2.2 4.

2.3 3 (indices run 0 to `length - 1`).

2.4 $7 + 2 + 9 + 4 = 22$.

2.5 index 4 is out of bounds – the array has length 4, so valid indices are 0 to 3; `a[4]` would throw an error.
