

Solutions

2.1

Thursday at 18:30; room 6.

2.2

Email access requests by Tuesday noon; a replacement is announced if room 6 becomes unavailable.

2.3

Later budgets are unknown; later harvest outcomes are unknown; neither the end of funding nor a causal explanation of failure is supplied.

2.4

Tuesday noon is the access-request deadline, not the meeting; the meeting is Thursday at 18:30 in room 6, not room 8; a replacement remains conditional and no other room is booked.

3.1

First-year funding used for raised planters; later budget and harvest records missing; no year comparison established; meeting Thursday 18:30 in room 6; Tuesday noon access deadline and conditional unbooked replacement; explains an abbreviation or arrow that preserves a relevant action or funding-use relationship.

3.2

Local analytic rubric, 8 × B1: accurate first-year funding and planter activity; later budget and harvest remain unknown; no invented later failure or funding end; correct Thursday 18:30 room 6 meeting; Tuesday noon access deadline; conditional replacement without a current booking; residents' question invitation and distinct date roles; coherent truthful 80–110 word response. Example: "The garden scheme used unusually generous first-year funding to install raised planters. However, the supplied records do not show later budgets or harvest totals, so they cannot establish whether later years succeeded or failed. They also do not show that funding ended. The next open meeting is on Thursday at 18:30 in room 6. Email access requests by Tuesday at noon. If that room becomes unavailable, the coordinator will announce a replacement, but another room is not currently booked. Residents are invited to suggest questions for the next review. Keep the request deadline separate from the meeting time."
