

Solutions

2.1 The description records a location and count. Friendship, status and exclusion are hypotheses. Repeat observations at comparable times and ask voluntary, non-leading questions where approved. Record how the observer's friendships influence access and interpretation. Do not label identifiable people or assume consent from silence. Authored points for identifying relevant evidence, explaining a supported inference and a material limit.

3.1 Retain the exception and compare timing, activity and participants. Revise a general friendship claim to a bounded observed pattern unless further evidence supports it. A discrepant observation can test the interpretation; deleting it would conceal evidence. Authored points for a relevant judgement, reason tied to the case and justified qualification or method. Accept a supported alternative.
