

Solutions

2.1 Establish the source and eligible previously unstudied tradition, verify meaning and restrictions with reliable material, then select one bounded convention for approved practice. Record first and revised trials and explain the researched reason for change. Authored points for identifying relevant evidence, explaining a supported inference and a material limit.

3.1 Check authorship, context, purpose and the precise convention, compare reliable evidence and retain the uncertainty. Revise approved practice if warranted and credit the source. Neither a convenient caption nor practitioner status alone settles every contextual claim. Authored points for a relevant judgement, reason tied to the case and justified qualification or method. Accept a supported alternative.
