

E4.4 Similarity

Name: _____ Class: _____ Date: _____

Total: 9 marks

KEY WORDS similar 相似 • similar shapes 相似形 • scale factor 比例因子 • area and volume 面积和体积
• triangle 三角形

Objective

Build the skills to answer Extended exam questions on **similarity** 相似 — **similar shapes** 相似形, the **scale factor** 比例因子, and the **area and volume** 面积和体积 ratios k^2 and k^3 .

You must be able to:

- find a missing length in similar shapes
- use the area ratio k^2 for similar shapes
- use the volume ratio k^3 for similar solids

1 Worked examples

- Similar shapes and solids

$$\text{interior} + \text{exterior} = 180^\circ$$

Similar shapes have equal angles and sides in the same ratio

Similar shapes are linked by an enlargement

- **Similar** 相似: same angles, all sides $\times$ the **scale factor** 比例因子 k .
- $\frac{\text{area } A}{\text{area } B} = k^2$; $\frac{\text{volume } A}{\text{volume } B} = k^3$.
- **Worked:** lengths 2 : 3, smaller volume 40 cm³ $\rightarrow$ ratio 8 : 27 $\rightarrow$ larger = $40 \times \frac{27}{8} = 135$ cm³.

Answer shapes: M1 a correct method, A1 the correct answer.

2 Practice

2.1 Two similar triangles have a scale factor of 3. A side of the small triangle is 4 cm. Find the matching side of the large triangle. [1]

2.2 Two similar shapes have lengths in the ratio 2 : 5. Write down the ratio of their areas. [1]

2.3 Two similar solids have lengths in the ratio 1 : 2. Write down the ratio of their volumes. [1]

3 Exam-style questions

3.1 Two similar shapes have lengths in the ratio 3 : 4. The area of the smaller is 18 cm². Find the area of the larger. [3]

3.2 Two similar bottles have heights 10 cm and 15 cm. The smaller holds 400 ml. Find the volume of the larger. [3]

Solutions

Marking: **M1** a correct method, **A1** the correct answer.

2.1 $4 \times 3 = 12$ cm.

2.2 $2^2 : 5^2 = 4 : 25$.

2.3 $1^3 : 2^3 = 1 : 8$.

3.1 area ratio $= 3^2 : 4^2 = 9 : 16 \rightarrow \text{larger} = 18 \times \frac{16}{9} = 32$ cm².

3.2 length ratio $10 : 15 = 2 : 3 \rightarrow \text{volume ratio } 2^3 : 3^3 = 8 : 27 \rightarrow \text{larger} = 400 \times \frac{27}{8} = 1350$ ml.
