Check meaning and form:

- My response conveys a message that fits the opening situation.
- I can explain the meaning of the pattern, rather than only naming it.
- This 来 is spoken; the real action must be clear from context (carrying, paying, ordering).
- It does not mean "come" here: 我来吧 is "let me (do it)", not "let me come".
- I tried a second response with a name, time, place, or description changed.

This is supported productive practice. Compare meaning and structure; your answer need not copy the model. A partner or teacher must hear the spoken response to comment on pronunciation.
